Financial Journalist	OTC Scoop

Knowledge and skills

This degree aims to produce production engineers who can install, operate, control and maintain highly complex audio equipment. Alongside their technical skills, graduates need to be able to work well in teams, find creative solutions to problems, work well under pressure and have high-level interpersonal skills.

Career opportunities

This degree places an emphasis on audio engineering and this is reflected in its destinations. Graduates might enter engineering roles in film, radio, and television or live sound broadcasting. Graduates can enhance their career prospects by taking any possible opportunities to get hands on experience of working in the industry. Further information and job descriptions can be found at Skillset (www.skillset.org.uk) and Prospects (www.prospects.ac.uk).
