## BSc (Hons) Computer Network Management

Percentage of leavers in known destinations (2009)

### Examples of employment obtained by leavers (2009)

Job title	Employer
Assistant Support IT Analyst	Ordinance Survey
IT Support and Network Analyst	Winchester & Eastleigh Healthcare Trust
Technical Consultant	Satisnet

### Knowledge and skills

Graduates study networked computer systems and have in depth knowledge of planning, designing and managing networks. They have the ability to plan a computer network to a specific brief using appropriate tools and understand how to meet the needs of varying types and sizes of business. They also understand the environment in which businesses operate and how to ensure that communication networks run smoothly and effectively.

### Professional accreditation

This course is accredited by the British Computer Society which can significantly reduce the time required to achieve professional membership of the BCS and registration as a chartered or incorporated engineer.

### Career opportunities

Employment opportunities reflect the use of networked computer systems across virtually all aspects of life and work and are with businesses or specialised consultancies. Employers include banks, retailing, hospitals, education and local and central government. Graduates also develop transferable skills in communication, numeracy, logical thinking, planning, presentation and teamworking which are valued by many employers.
