Examples of employment obtained by leavers (2009)

Job title	Employer
Web Designer	Information not supplied
Web developer	CFA PR
Computer Programmer	Clear Vision
Technology For Learning Intern	Southampton Solent University

Knowledge and skills

Graduates have in depth knowledge of the development and implementation of computer networks and web based systems and how they meet the needs of their users. They have experience of working with network technology, the ability to use appropriate tools and skills in web design.

Professional accreditation

This course is accredited by the British Computer Society which can significantly reduce the time required to achieve professional membership of the BCS and registration as a chartered or incorporated engineer.

Career opportunities

Employment opportunities reflect the use of networked computer systems across virtually all aspects of life and work and the involvement of many businesses with the internet and are with businesses or specialised consultancies. Employers include banks, retailing including on-line, hospitals, education and local and central government.

Graduates also develop transferable skills in communication, numeracy, logical thinking, creativity, planning, presentation and teamworking which are valued by many employers and open up other opportunities.
