Computing Publishing	DNS Ltd

### Knowledge and skills

Information technology is a key feature of work and home life and used for a wide range of business purposes. Graduates understand how IT can serve business and how computer users relate to the technology and can use it effectively and efficiently. They understand the technology involved in transferring and communicating information internally and externally and focus on the operation of computer networks. They have significant practical computing skills and in addition they develop good team working and communication skills, including presentation.

### Professional accreditation

The course is accredited by the British Computer Society.

### Career opportunities

Opportunities are available in many areas, including business analysis, marketing, finance, network management, education and training. Positions may be in large IT companies, consultancies, financial services, web-based business, retailing or the public sector.
