Broadcast Systems Engineer	Television Systems Ltd
Camera Assistant	The Cruet Company
Entertainment Technology Intern	Southampton Solent University
Graduate Engineer	Tandberg Television
Service Support Technologist	Christie Digital Systems Canada Inc
Telecom Consultant	Between the Lines Communications

Knowledge and skills

Graduates understand the technology used in media production and the underpinning electronic principles, having a particular focus on broadcasting. They have the skills to set up equipment, use it and maintain it and have experience of working in modern studios with appropriate hardware and software. They also have transferable skills including team working, logical thinking, problem solving, numeracy and I.T.

Career opportunities

There are opportunities as production engineers usually linked to production, post-production or transmission and the main employers are broadcasters and equipment manufacturers. The transferable skills developed and understanding of electronic engineering could also be used in other employment sectors.
