BSC(Hons)Web Design

Percentage of leavers in known destinations (2009)

The first students to complete this course will be in 2011, surveys of graduates from this course will therefore begin then.

An insight into the sorts of options available to students at the end of this course can be gained by looking at destinations of leavers from similar courses. Follow the links below to view the destinations of students graduating from:

- BSC (Hons) Information and Communication Technology

Knowledge and skills

Graduates possess a combination of graphical and design skills, together with the underlying technical knowledge needed to work effectively and professionally in the IT industry. They can use tools and techniques to create websites including integrating sound and moving image content. Graduates also develop transferable skills in communication, numeracy, logical thinking, creativity, planning, presentation and planning.

Career opportunities

There is an increasing trend for businesses to have a presence on the internet, creating opportunities to work directly for organisations in website development, or for specialised web design consultancy firms. The skills developed on this course are therefore valued by employers across a wide range of sectors, opening up opportunities in a large number of industry areas. Self employment is also an option for graduates on this course. There may be schemes available offering help and financial advice to support new businesses.
