MSc APPLIED AI AND DATA SCIENCE

Hello and welcome to your course! We are delighted to have you join us as you begin the next stage of your educational and professional journey.

This postgraduate conversion course is designed for students from a wide range of academic backgrounds who are eager to develop practical skills in Artificial Intelligence and Data Science to address real-world challenges. With growing demand for skilled professionals in these fields across the UK market, this course has been carefully developed in collaboration with industry partners and leading experts from both academia and industry. The programme offers a strong balance of theoretical knowledge and practical application, preparing you for a variety of high-demand careers, including Data Scientist, Data Analyst, Machine Learning Engineer, and many more.

Enhancing your employability is one of our key priorities. Throughout the course, you will develop valuable transferable skills such as project management, problem-solving, communication, and teamwork, all of which are highly sought after by employers. You will also have the opportunity to undertake an industrial placement to further strengthen your practical experience and professional development.

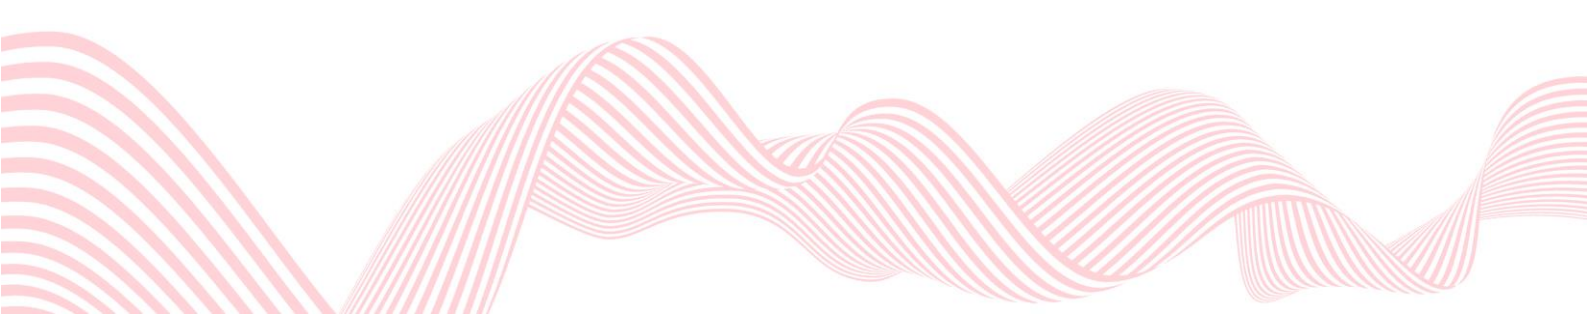

At the start of your course, you will be invited to attend a range of welcome events during Welcome Week. These sessions are designed to help you settle in, meet fellow students, learn more about the course, and become familiar with university life. Teaching will begin in the week following the induction period, and we strongly encourage you to attend all welcome activities and arrive on time.

We hope your time on the course will be both rewarding and enjoyable, helping you achieve your academic and career aspirations. We look forward to welcoming and supporting you throughout your journey with us. If you have any questions about the course, please feel free to contact me via email at shakeel.ahmad@solent.ac.uk.

Looking forward to seeing you.

Prof (Assoc.) Dr Shakeel Ahmad

KIT LIST

While the University has more than enough resources to support your on-site learning, we recommend that all students consider bringing their own laptops.
