MSc CYBER SECURITY

Hello and welcome to your course! We are glad that you will be joining us as you take the next step in your educational career and personal development.

As organizations and government departments become increasingly reliant on virtual environments and computer networks, cyber security has become an important part of day-to-day life. This conversion postgraduate course in cyber security engineering is well suited to students from a wide range of backgrounds, helping you to develop new skills and gain an advanced knowledge of computing, networking and information security.

This conversion master's course will equip you with the essential skills and knowledge to become cyber security specialists, learning how to tackle cybercrime and manage security systems. As well as gaining a firm grounding in web and software development, you will learn the necessary skills to become ethical hackers, penetrate test networks, and prevent and eradicate malware. The industry is facing the challenge of a shortage of skilled workforce in cyber security and needs you.

At the start of your course, you will have the opportunity to take part in a range of events during welcome week. During this week you will be introduced to your course, the academic team, and have an opportunity to meet your fellow students. Teaching on the course will start from the following week so we strongly encourage you to arrive on time.

We hope you will find your course a fulfilling experience that helps you achieve your educational and career aspirations. We look forward to welcoming you to your course and supporting you on your journey. If you have any course-related questions, you can reach me via email at shakeel.ahmad@solent.ac.uk.

I look forward to seeing you in September!

Prof (Assoc) Dr Shakeel Ahmad

Course Leader
