

Greeting traveller!

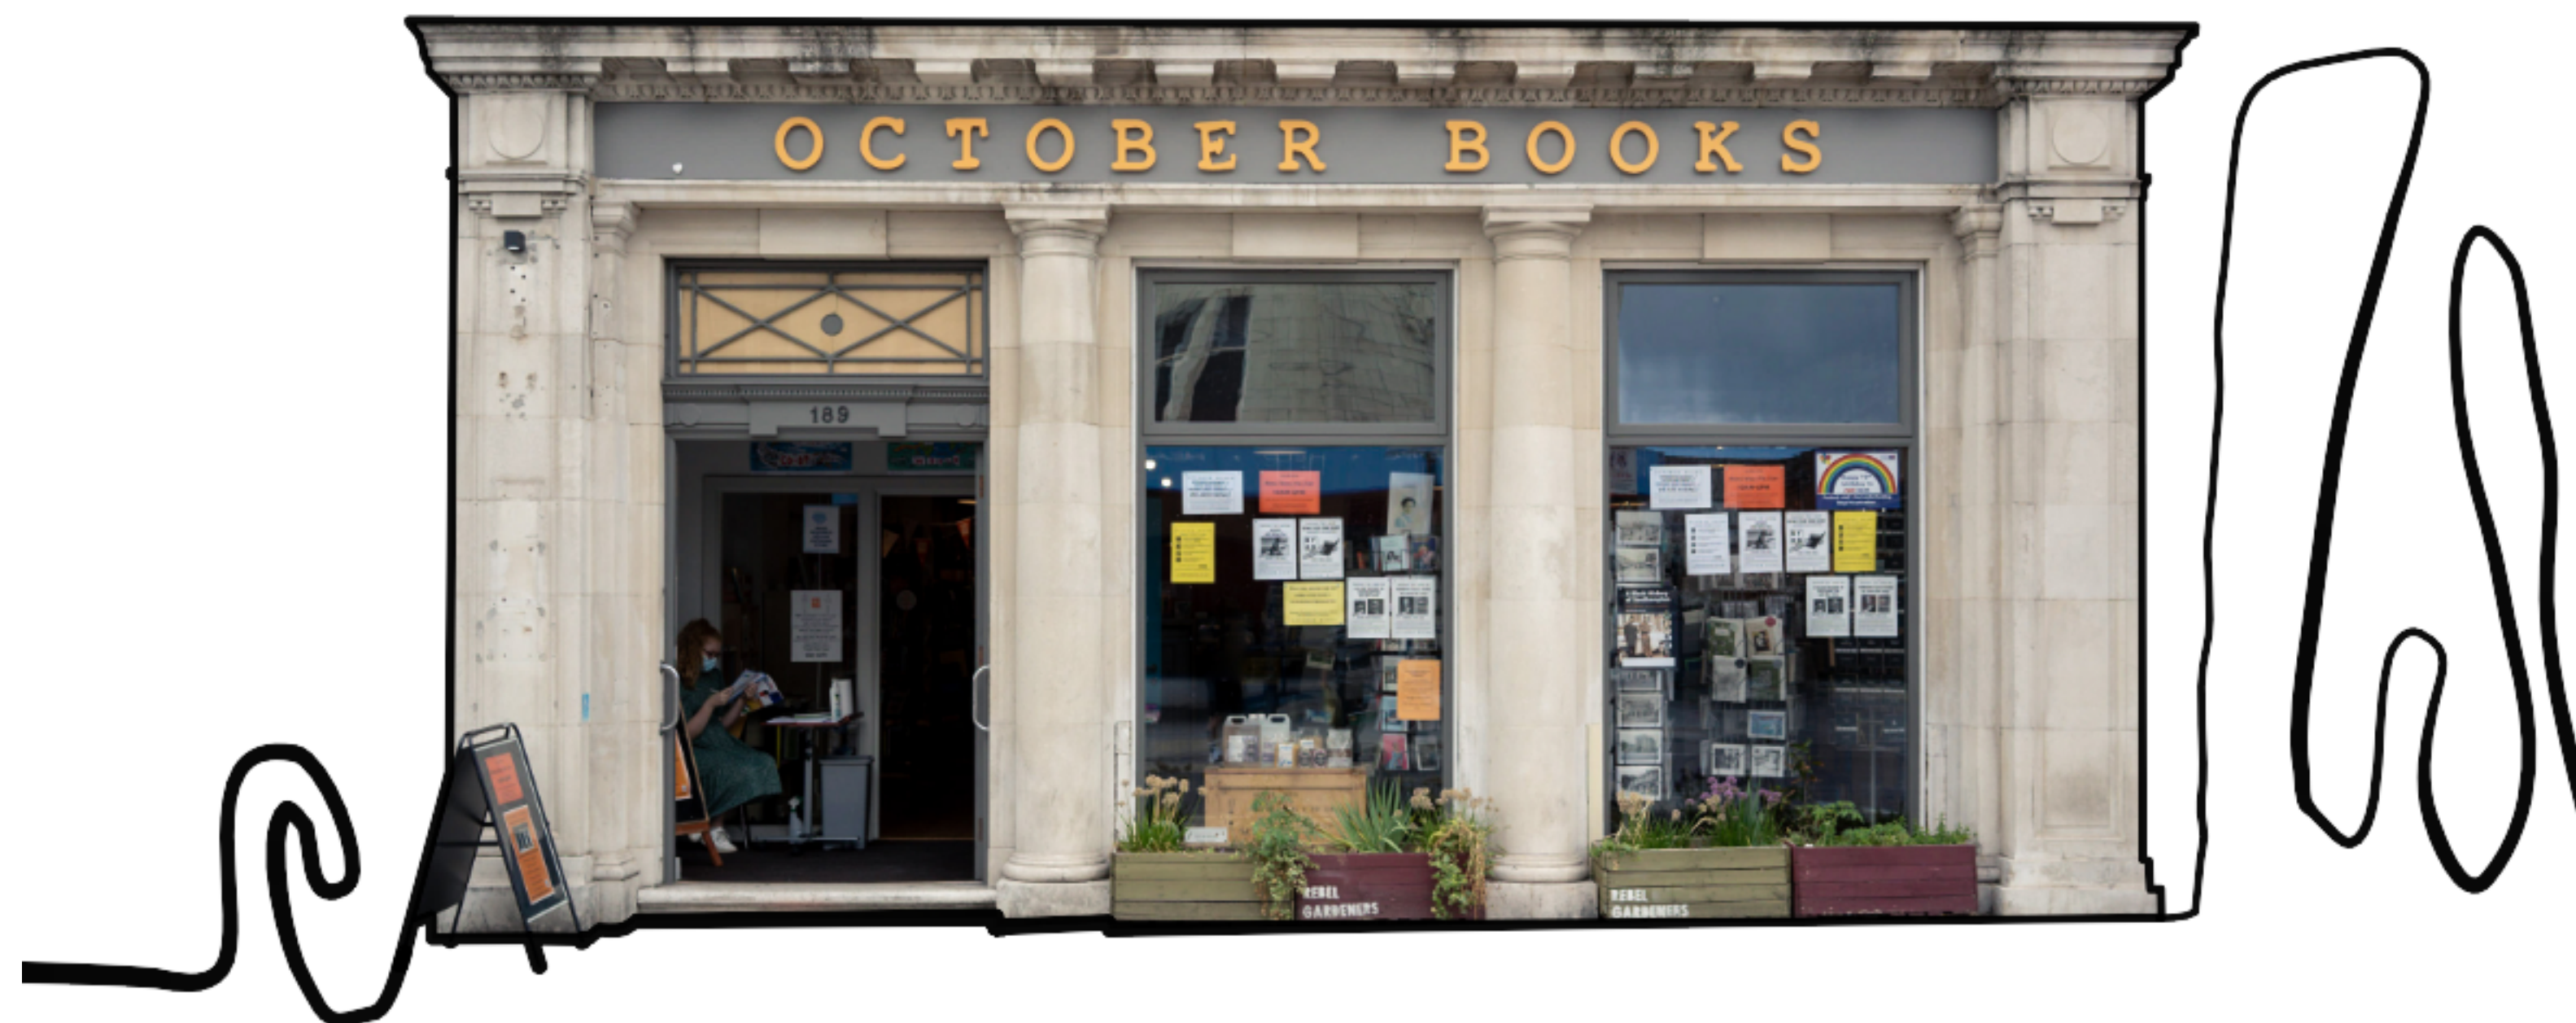

You are probably new in Southampton, or you are just seeking fresh information. You are in the right place! This remarkable guide will provide you with the juiciest tips on how to live the best life you could imagine on budget and Eco friendly. Yea you heard it right! You will save money, and during that, you will also be fresh, responsible hero, the defender of the human realm.

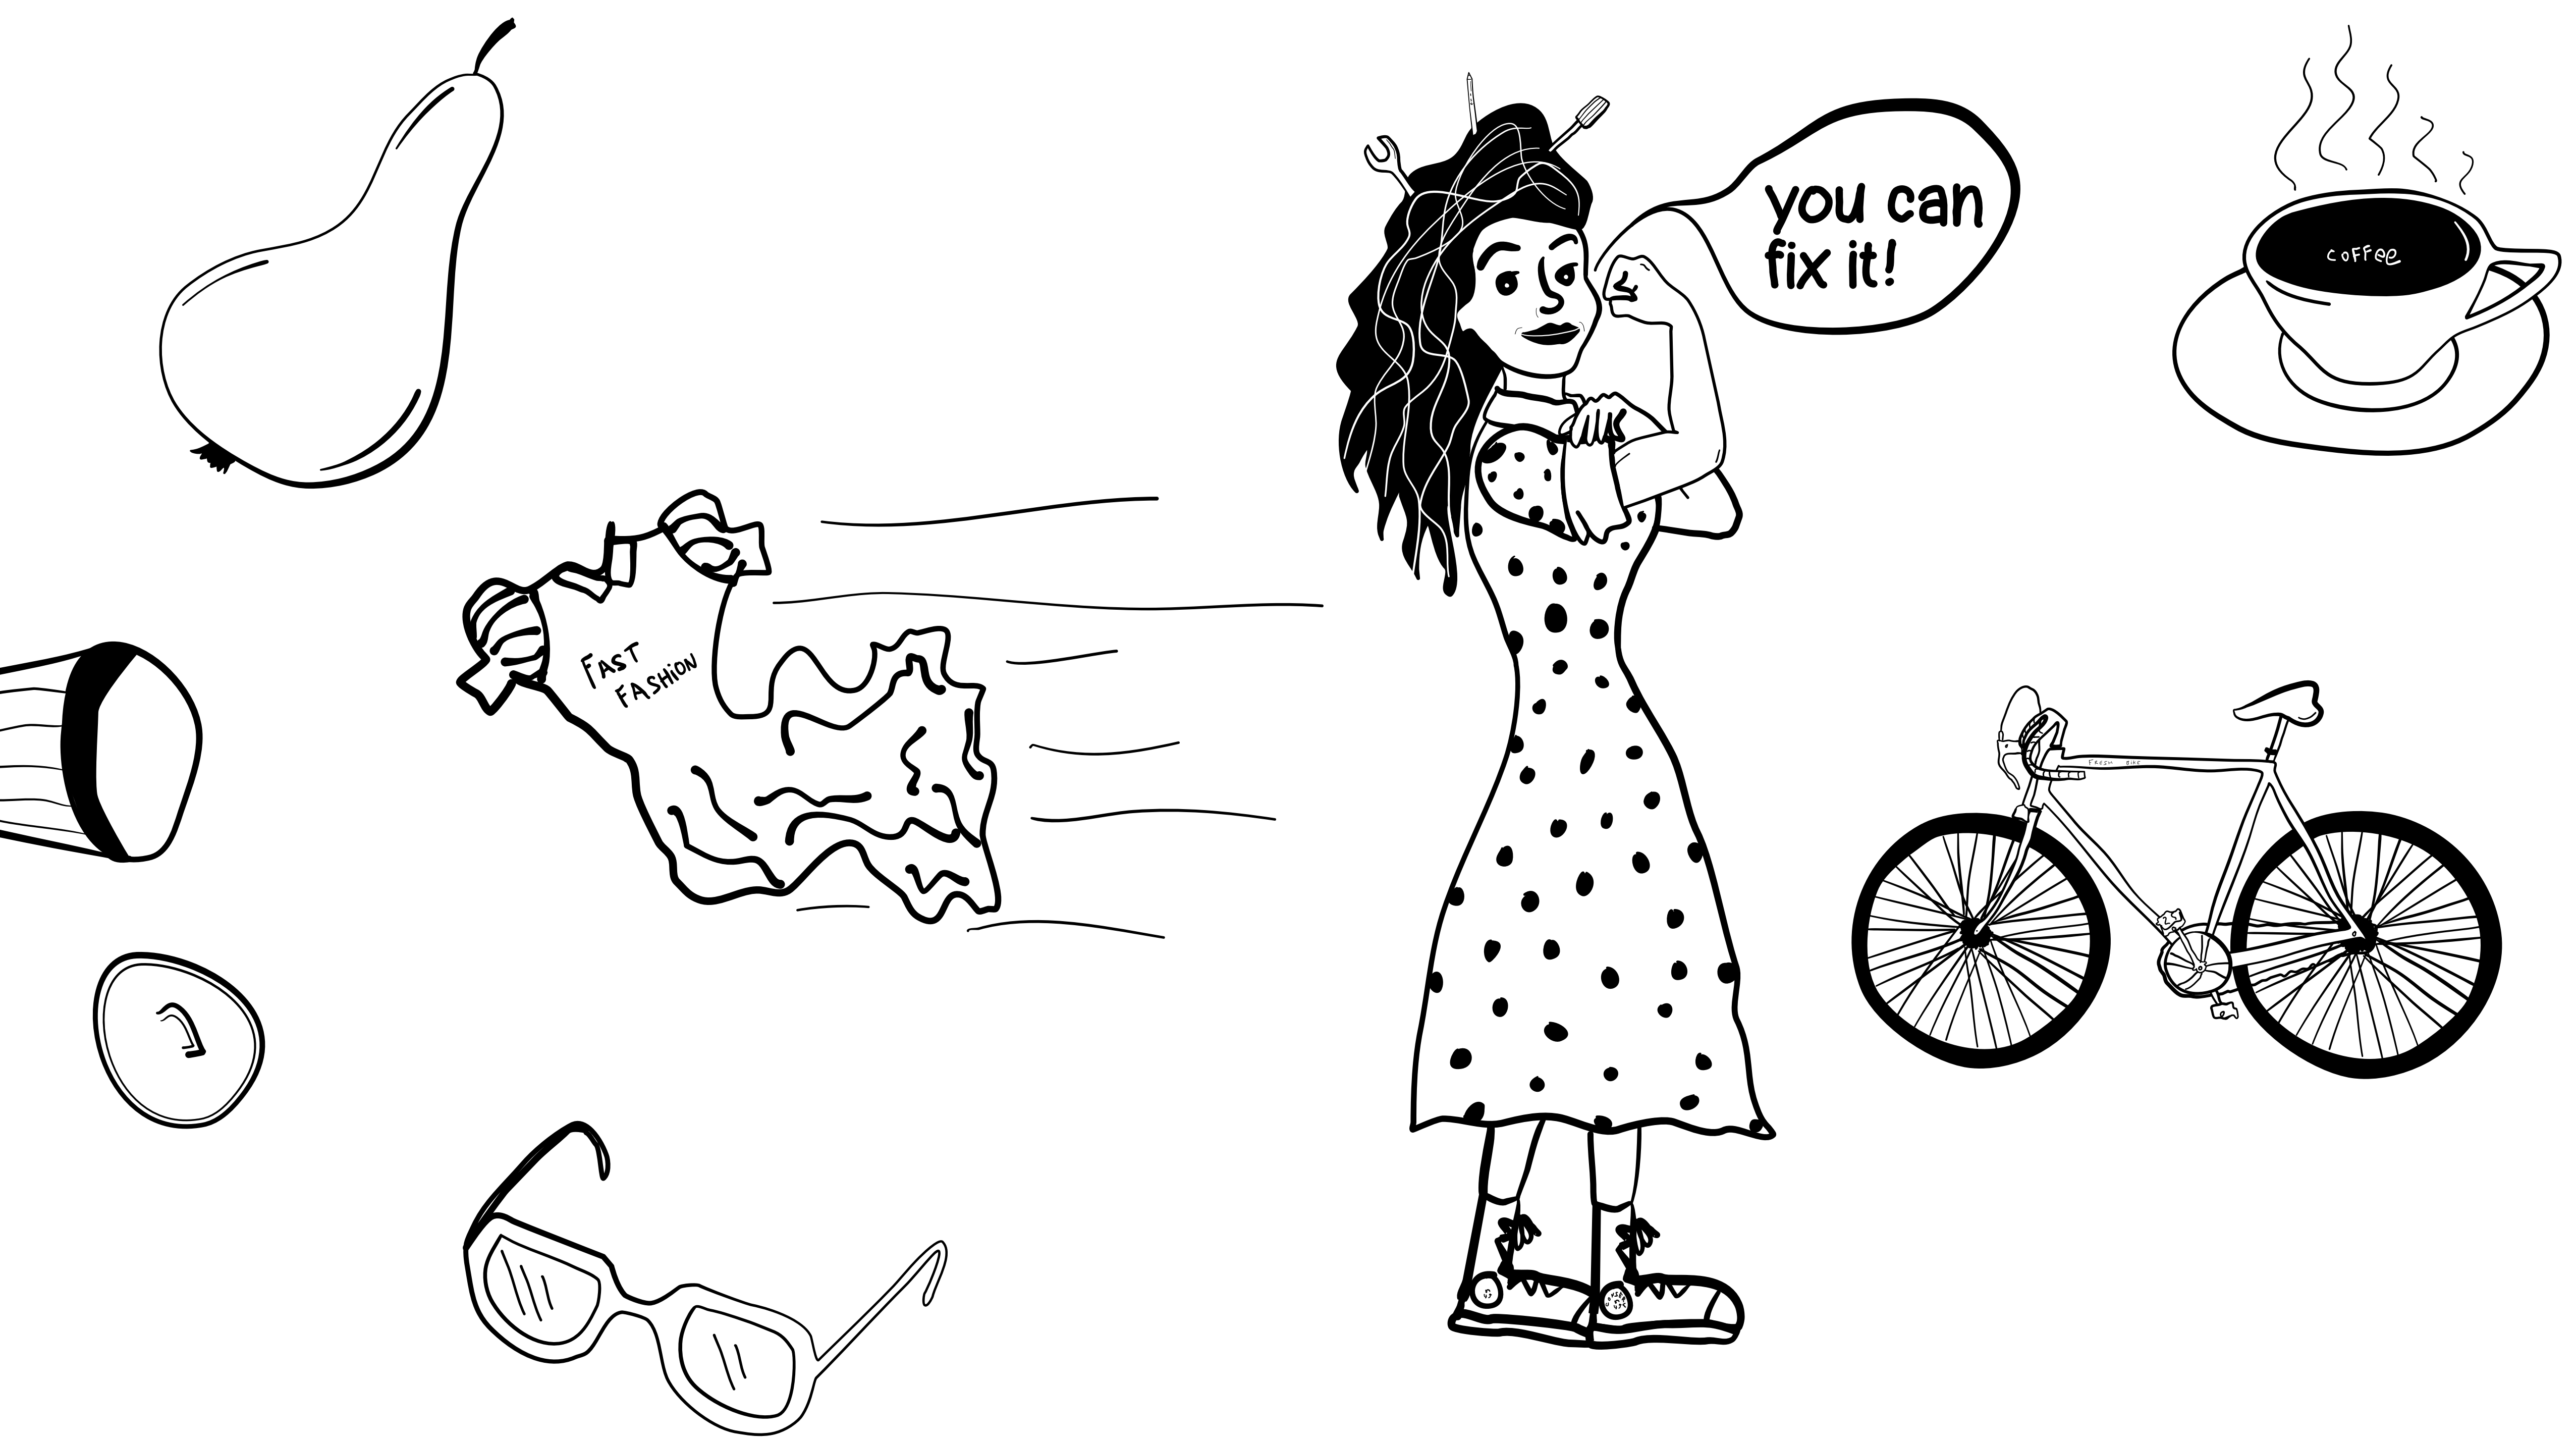

Shopping

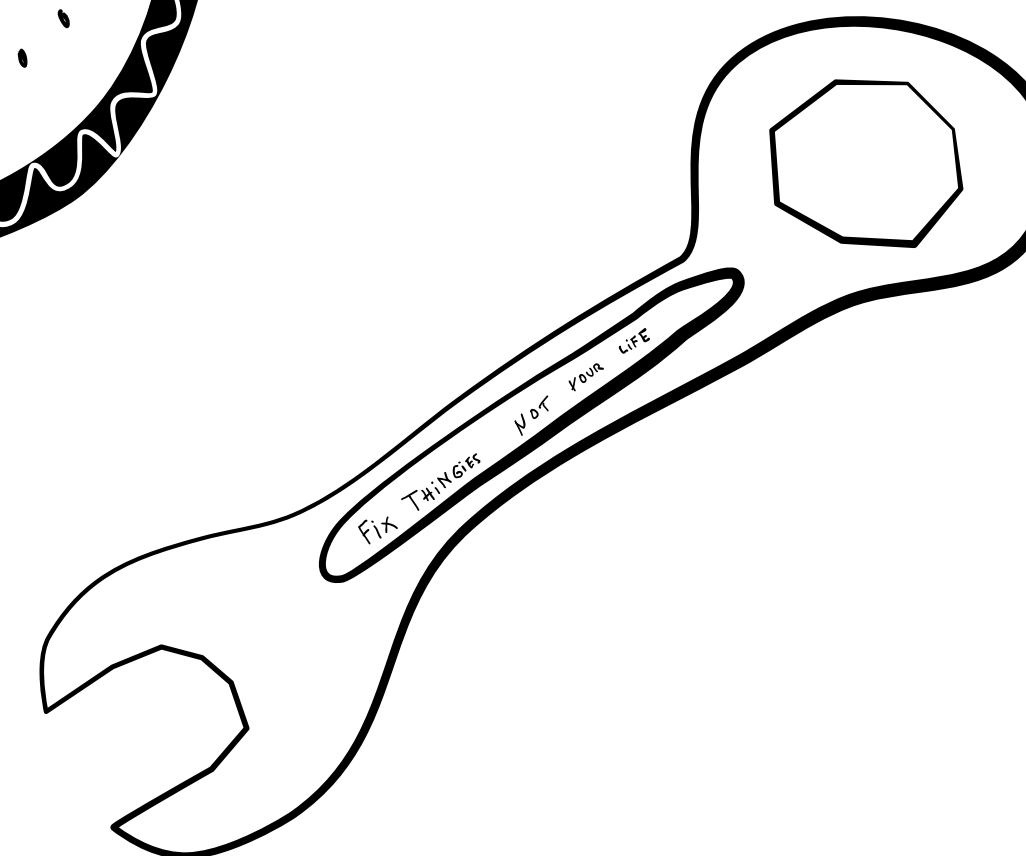

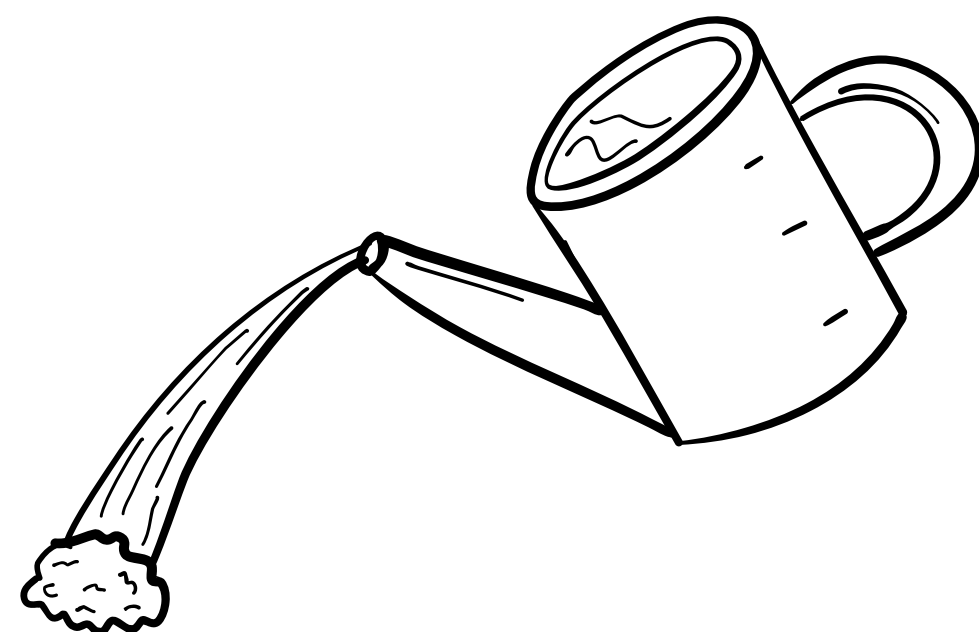

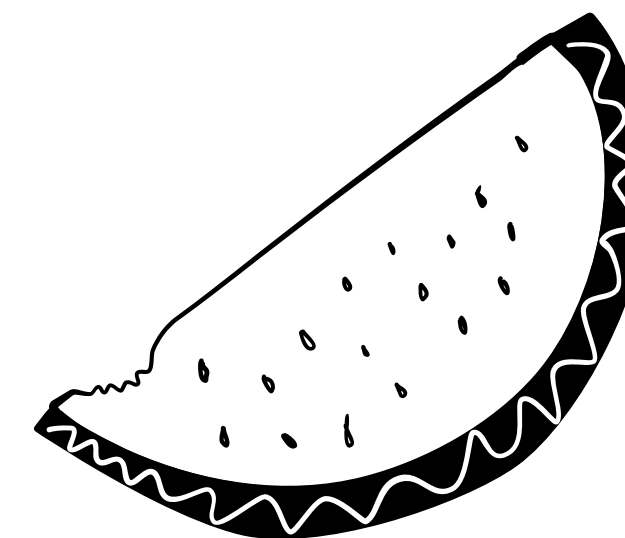

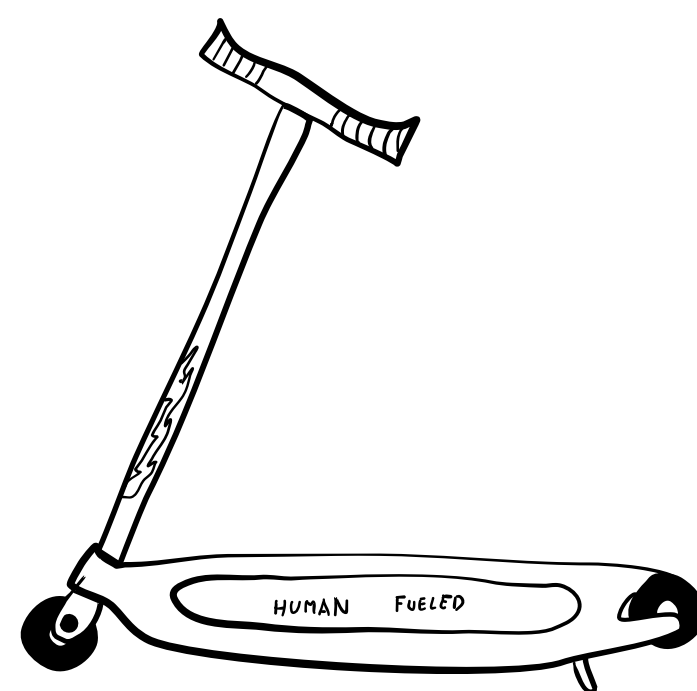

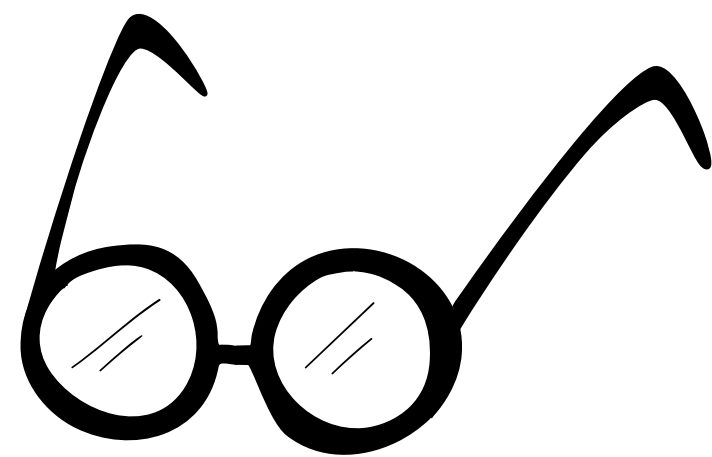

Obviously, you want to look as lit as possible during your school terms, right? Maybe some fresh clothes will do the job! If you don't want to spend a fortune, you basically have two options - you can either go to some crazy, fast fashion, corporate store and buy ugly, generic, low-quality, unethical, child-manufactured stuff (you could probably still smell the children's tears from the clothes) OR you can buy some second-hand awesomeness that is unique, probably higher quality and stylish as the devil himself. Don't be a boring generic primate, express yourself while staying ethical.
